

Outpatient Services

Outpatient services are available at Ephraim McDowell Behavioral Health, located at 124 Daniel Drive in Danville. The facility is staffed by a psychiatrist, advanced practice providers and clinical social workers. Services are provided to adult patients and children age 5 and older. Some children may need to be referred elsewhere for specialized care.

Services include:

- Comprehensive, confidential psychiatric assessment and treatment
- Dual diagnosis treatment
- Individual and family therapy
- After-care planning

To receive outpatient services, new patients will be scheduled only with a referral from the patient's primary care provider. Appointments can be scheduled by calling (859) 239-5570.

Behavioral Health Services

Behavioral Health Services

Taking care of yourself means also taking care of your mental health. Life situations can often cause stress, not only to your physical health but also to your mental health.

Ephraim McDowell Regional Medical Center offers both inpatient and outpatient behavioral health services to help you cope with issues in your life, such as anxiety, depression, dementia or paranoia.

Inpatient Services

Our 20-bed acute inpatient facility offers a personalized treatment approach to adults 18 and older who suffer from emotional issues, mental illness or substance use disorders. Our services can help you learn to cope with various situations. The unit is staffed by nurses, activity therapists and other support personnel. They provide individual- and group-focused activities to help patients learn more effective tools for living.

Our Acute Inpatient Services include:

- Short-term inpatient programming
- Comprehensive, confidential psychiatric assessment
- Medication management
- Substance use with dual diagnosis treatment
- Individual, group and family therapy
- Educational programs
- Discharge and after-care planning

Senior Adult Services

Older adults may face challenges specific to aging. Some of these difficult life changes may result in various behavioral symptoms ranging from anxiety and/or depression to dementia and paranoia. Our Acute Inpatient Senior Adult Program understands these changes and offers a warm and welcoming environment specifically designed to assist older adults better manage the changes they may be experiencing.

Services include:

- Comprehensive, confidential psychiatric assessment
- Crisis evaluation and medical screening
- Individual and group therapy
- 24-Hour patient care and medication management
- Discharge and after-care planning

Patients can be admitted for adult services and senior adult services 24 hours a day, seven days a week. They may self-refer or be referred by their physician, family member, friend or other health care professional. Please call (859) 239-4000 for referrals or questions.
